Edge Ecosystem

Enterprise-ready B2B platforms • CRM • Automation • Integrations

What we build

- Platforms & CRM: portals, RBAC, workflows, dashboards

- Automation & integrations: API-first, bots, ETL, payments

- Reliability: CI/CD, observability, runbooks, release discipline

Engagement model

- Pilot MVP in 2–6 weeks: one metric + demo + decision artifact

- Monthly retainer: roadmap + continuous delivery + measurable outcomes

- Productize: license / white-label to adjacent companies

Transferable packaging

- Assignable contracts and clear deliverables

- IP owned by the LLC: repos, licenses, access control

- Monthly reporting + dataroom readiness

Enterprise readiness

- Security basics: least privilege, audit logs, secrets hygiene

- Operations: monitoring, backups, incident playbooks

- Procurement: documentation, traceability, clear scope

Next step

- Replace placeholders (domain, email, bot, calendar)

- Publish as a fast static site (no server maintenance)

- Maintain 30 minutes per month
